🐙 G-varshitha

SKILLS

Programming Languages: Java, Python, JavaScript **Frontend:** HTML, CSS, React

Backend: Java Spring Boot **Database:** MySQL **Core Concepts:** Object-Oriented Programming (OOP), Data Structures and Algorithms (DSA)

Tools & Technologies: Git, GitHub, JDBC, Java Swing, VS Code, IntelliJ IDEA, MySQL Workbench

PROJECTS

Student Management System | *Java, JDBC, Java Swing, MySQL*

🐙 GitHub

- Developed a fully functional desktop-based **Student Management System** using **Java**, **JDBC**, and **MySQL** to automate and streamline student record management operations.
- Designed and implemented an interactive **Java Swing** GUI with intuitive navigation, enabling users to perform add, update, delete, and search operations with real-time feedback.
- Implemented robust **CRUD operations** with complete database connectivity, input validation, and exception handling to ensure data integrity and application stability.
- Applied **modular project architecture** separating UI, business logic, and data access layers, improving maintainability and code reusability.
- Managed full project lifecycle using **Git** and **GitHub** for version control, commit history tracking, and structured collaborative development workflow.

Phishing Website Detection | *Machine Learning, Python, HTML, CSS*

Dec 2025 – Apr 2026

- Built an end-to-end **phishing website detection system** using **Python** and **Machine Learning** to automatically identify and classify malicious URLs with high accuracy.
- Trained, tested, and evaluated multiple **ML algorithms** including Random Forest and Logistic Regression, selecting the best-performing model based on precision and recall metrics.
- Developed a user-friendly **web interface** using **HTML** and **CSS** allowing users to input URLs and receive real-time phishing detection results.

EXPERIENCE

Tap Academy

May 2026 – Present

Software Development Intern

Bangalore, India

- Developed and maintained scalable **Java** applications using **Core Java**, **JDBC**, and **MySQL**, implementing efficient **CRUD operations** and robust database integration for real-world use cases.
- Collaborated with the development team on software tasks including feature implementation, debugging, and code optimization while adhering to coding standards and best practices.
- Applied **OOP principles** to design modular, reusable components and maintained structured version control workflows using **Git** and **GitHub** throughout the development lifecycle.
- Participated in code reviews and technical discussions, contributing to improved software quality and strengthening practical understanding of full stack development processes.

ACHIEVEMENTS

- Designed and delivered a fully functional **Student Management System** independently, demonstrating end-to-end software development skills across **Java**, **JDBC**, **MySQL**, and **Java Swing**.
- Built a **Phishing Website Detection** system using **Machine Learning**, showcasing applied skills in Python, data preprocessing, feature engineering, and model evaluation for a cybersecurity use case.

EDUCATION

Sanskriti School of Engineering

Puttaparthi, India

B.Tech in Computer Science and Engineering (CGPA: 7.5/10)

2023 – 2026

Government Polytechnic for Women

Hindupur, India

Diploma in Electronics and Communication Engineering (81.27%)

2020 – 2023
